WORK EXPERIENCE:

Skinstric AI – Remote

Client Facing Frontend Engineer | Jan 2024 – Present

Served as primary client facing owner for an AI powered SaaS platform supporting performance driven workflows and user experience optimization.

- Managed end to end client success lifecycle including onboarding performance monitoring and issue resolution
- Supported 20 plus active client stakeholders while maintaining high satisfaction and trust
- Translated technical system behavior into clear business insights for non technical clients
- Identified workflow bottlenecks and improved automation reliability and speed
- Collaborated with engineering teams to resolve production issues under tight timelines
- Owned delivery quality timelines and client outcomes
- Supported revenue retention and expansion by aligning performance outcomes with client business goals

Frontend Simplified – Remote

Client Success and Support Specialist | Jun 2023 – Mar 2024

Managed high volume client accounts in an agency style SaaS environment focused on growth retention and upsells.

- Managed 25 plus active client accounts simultaneously
- Led onboarding calls and ongoing success check ins via Zoom and Slack

- Explained KPIs and campaign performance clearly to clients
- Improved retention by approximately 15 to 20 percent through proactive communication
- Identified upsell opportunities based on performance gaps and client goals
- Collected feedback and coordinated improvements with internal teams

Axcess Financial – Cincinnati, OH

Client Focused Frontend Developer | Jan 2022 – April 2023

- Supported performance dashboards used for executive decision making
- Tracked usability and workflow metrics to improve adoption
- Explained system behavior and data flow to non technical teams
- Collaborated cross functionally with product and operations
- Resolved issues quickly under tight deadlines

PROJECTS:

[Search API Project:](#)

- Developed a search and display system for movies and media using dynamic routes and responsive pages.
- Integrated third-party APIs using Axios and jQuery for real-time search results.
- Designed user-friendly routing and loading states with Next.js for seamless navigation.

[Animation Video app:](#)

- Created a motion-rich web experience using modern animation libraries and video integration.
- Built fully responsive UI using TailwindCSS and Bootstrap.
- Implemented scroll-based transitions and music playback using GSAP and Framer Motion.
